Managed departments in sales, trade-ins, maintenance, and online auctions throughout various retail stores ensuring the companies best interests towards customer satisfaction and economic development.

EDUCATION

University of Central Florida, FL, 2019.

Cert. in Full Stack Web Development

Daytona State College, FL, 2018.

A.A. in Computer Science and Engineering

CERTIFICATIONS

Full Stack Web Development at University of Central Florida, FL (MERN Stack)

Overcame the fast-paced learning environment of the JavaScript language and frameworks by utilizing documentation research, Agile based team methods, and goal-orientated development to craft innovative conclusions for the daily coding challenges and intensive, large-scale projects.

PROJECTS

Graffiti Earth

An augmented-reality app in early development that integrates geolocation data via Google Maps API and React Native for Mobile UX. Hoping to accomplish an app that allows users to cast “digital graffiti” around the globe, posting coordinates and visual data to databases limited by users’ “paint” which is purchasable. Excited about this one, keep in touch!

Taste Buds

A social media / dining-roulette app where users create an account, add friends, and spin the roulette wheel to receive a randomly selected restaurant to eat at. Within two weeks, our team completed this full stack application geared by foundations of the Agile methodologies using sprints, daily stand-up meetings, and test-orientated development. Received “best project in class” during the bootcamp for the accomplishment of developing a “one-to-many” database relational system in MySQL allowing users to input other users as friends. (Express, Handlebars, MySQL, HTML, CSS, Node, Sequelize)

Band-Aide

All-in-one artist search engine that enables users to search for the entirety of an artist’s media outlets by connecting to the various API’s of YouTube, iTunes, Ticket Master. Heavy documentation research let to a thorough understanding of various types of API’s and the ability to finish early and focus on creating a polished UI. (Express, Bootstrap, CSS, HTML)

Also, I am a classically trained composer, singer/songwriter, dabble in Blender, and drink my coffee black. [Check the website!](#)
